NEWS

Date: March 1, 2017

Dear Friends,

I have heard rumors of a few robins being spotted. You know what that means? More snow! Of course that will just lead us right into some warmer spring weather. Although, all of this back and forth is really tough on the humans and bovines alike! Just remember that we have various CRI cow and calf care products that can help get us past this weather. From Push for calf energy to ReBound for cows calving in inclement weather we have many tools beside just information to help you!

Our dairy agent Amanda Young is putting together a Milk Quality workshop on March 13th from 10-2 at the UWEX building. A representative from AgSource as well as Pam Ruegg, DVM will be speaking on the "5 keys to improving mastitis therapy". Registration is due by March 6th so please let Amanda know if you can attend!

If anyone has any comments or suggestions for topics to add to the newsletter, please give me a call at 920-386-2637 or email at hollysmith@dodgecountydhia.org.

Sincerely,

Holly Smith

Dairy Talk

February 2017

UW – Extension Dodge County

Greeting Dairy Produceers!

We have had some exciting new additions to the UW-Extension office in Dodge County over the past year including Amanda Young (Dairy and Livestock), Dr. Loretta Ortiz- Ribbing (Crops and Soils), and Laure Dei (Agriculture Support Staff). These additions mean more programming and assistants to all Dodge County: dairy, livestock and crops producers.

As your new Dodge County Agriculture Agents, we are looking for your input on the programming you would like to see. This is your chance to influence the type of educational programming in agriculture that UWEX Dodge County offers. To do this please fill out the needs assessment survey you can find in this month's DHIA newsletter, and return it using the per-paid return envelope.

We hope you and your family are enjoying this warm winter weather 🐄

Amanda Young
Dairy & Livestock Agent
UW- Extension Dodge County

Herd Health

As many of you are probably seeing this years varying winter weather, frequently triggers respiratory problems. Bovine Respiratory Disease (BRD) always causes serious economic loss for producers of cattle.

All cattle are susceptible to respiratory disease, but stress is usually the trigger. Pay particular attention to animals undergoing stressors such as weaning, crowding, transportation, and feed changes. These factors reduce energy reserves that weaken the immune system, making animals more susceptible to disease.

Early detection and treatment of BRD is a priority to quickly reduce the impact on infected bovine. Initial clinical signs include an elevated temperature, nasal and eye discharge, walking with a stiff gait, a crusty muzzle, salivation and mild diarrhea. Rapid shallow breathing and coughing are also early signs. Affected animals will hang their heads, look lethargic and often stand away from other cattle in the pen.

Wise managers will consult with their veterinarian to determine treatment protocols. 🐄
